## Service Agreement Continued

- I. PURPOSE. The Travis County MUD No. 10 (the "District") is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the District will begin service. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this agreement.
  
- II. RESTRICTIONS. The following unacceptable practices are prohibited by State Regulations.
  - A. No Direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
  
  - B. No cross-connection between the public drinking water supply and private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
  
  - C. No connection which allows water to be returned to the public drinking water supply is permitted.
  
  - D. No pipe or pipe fitting which contains more the 8.0% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
  
  - E. No solder or flux which contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection which provides water for human use.
  
- III. SERVICE AGREEMENT. The following are the terms of the service agreement between Travis County MUD No. 10 (the District) and \_\_\_\_\_(the Customer).
  - A. The District will maintain a copy of this agreement as long as the Customer and/or the premises is connected to the District's water system.
  
  - B. The Customer shall allow his/her property to be inspected for possible cross-connections and other potential plumbing practice. These inspections shall be conducted by the District or its designated agent prior to initiating new water service; when there is reason to believe that cross-connection or other unacceptable plumbing practices exist; or after any major changes to the private plumbing facilities. The inspections shall be conducted during the District's normal business hours.

- C. The District shall notify the Customer in writing of any cross-connection or other unacceptable plumbing practice which has been indemnified during the initial inspection or the periodic reinspection.
- D. The Customer shall immediately correct any unacceptable plumbing practice on his/her premises.
- E. The Customer shall, at his/her expense, properly install, test, and maintain any backflow prevention device required by the District. Copies of all testing and maintenance records shall be provided to the District.
- F. Customer understands and agrees that the District does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time.
- G. The Customer shall allow the District access to his/her property to inspect, maintain, and repair the grinder pump. The inspection shall be conducted during the District's normal business hours. The customer shall be notified 24 hours in advance, when possible, and in writing of an inspection or maintenance of the grinder pump. All repairs shall be considered an emergency and customer notification shall not be necessary.

**Effective June 1, 2010, all new homes or other facilities served by a grinder pump shall have either a wireless or hard wired warning device installed inside the home or facility to notify the customer of a grinder pump malfunction. The District's operator will inspect this device before issuing the connection permit.**

IV. ENFORCEMENT. If the customer fails to comply with the terms of the Service Agreement, the District shall, at its option, either terminate service or properly install, test, and maintain an appropriated backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Customer.
